

STRENGTHEN SOCIAL SECURITY

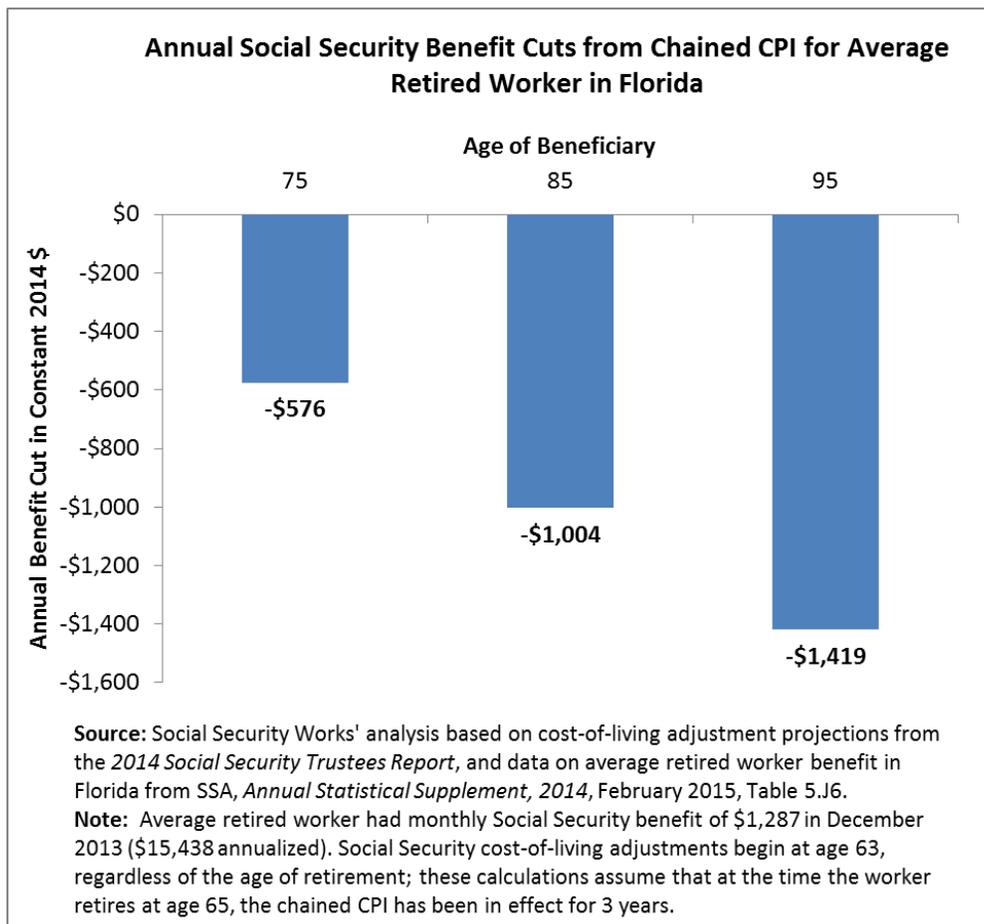

...don't cut it.

Chained CPI Would Harm Veterans and Social Security Beneficiaries in Florida

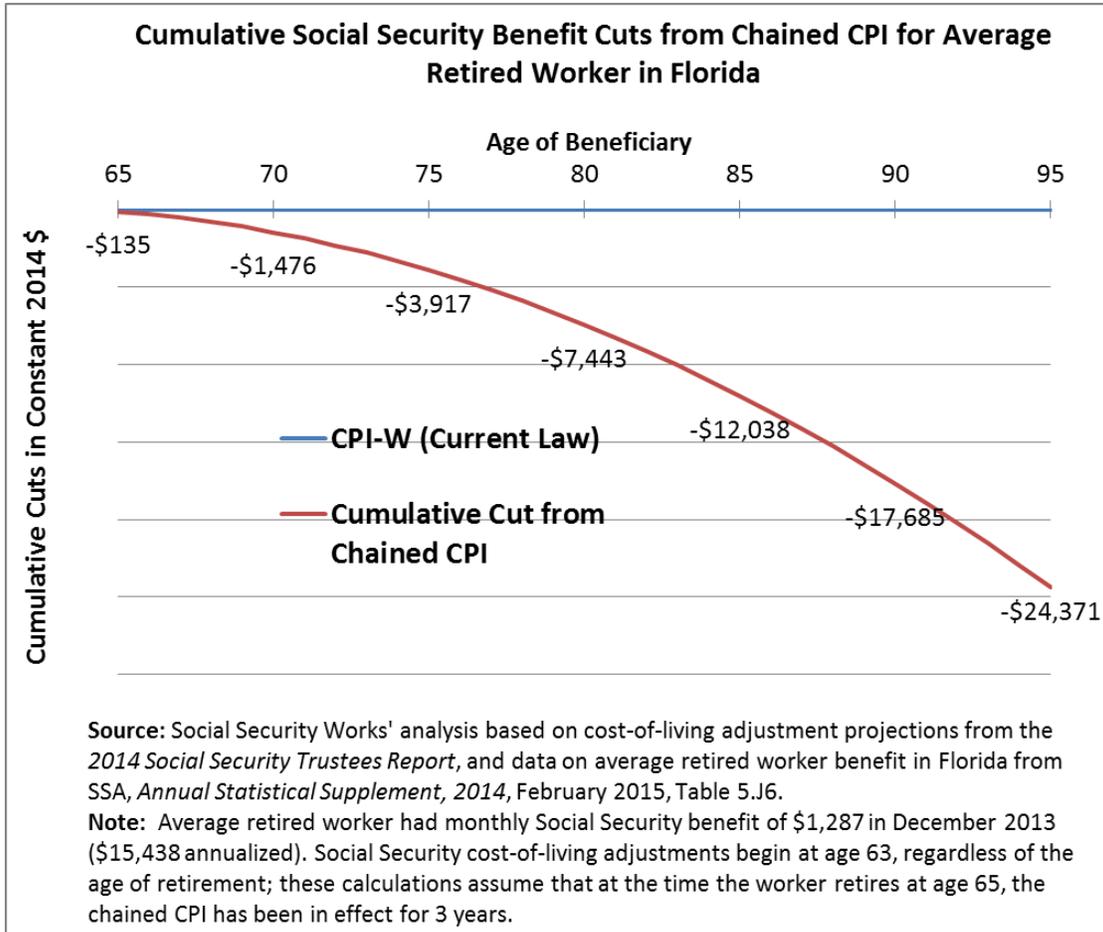

As we celebrate the 79th anniversary of our Social Security system, some politicians in Washington are proposing to cut benefits for veterans and Social Security beneficiaries in Florida by changing the formula used to calculate cost-of-living adjustments (COLAs). The stingier formula, known as the chained CPI, would significantly cut the benefits of all current and future Social Security beneficiaries, including retired and disabled veterans. Veterans would be hurt most of all, given that other benefits veterans receive – in addition to their Social Security benefits – would also be cut by the chained CPI.

Chained CPI's Social Security Cut Targets Oldest Old and Long-Term Disabled

If Congress cuts Social Security benefits with the chained CPI, Florida residents' hard-earned benefits would decline substantially over time. The average earner retiring at age 65 would get a \$576 annual cut at age 75, a \$1,004 cut at age 85, and a \$1,419 cut at age 95.¹

Cumulatively, the average Florida worker’s benefits would be cut by \$3,917 by age 75, \$12,038 by age 85, and \$24,371 by age 95. These proposed COLA cuts would have their biggest impact when benefits are needed the most, in very old age or when someone has been receiving disability benefits for many years.

Nearly 1 in 5 Florida residents (21 percent) – 4,114,745 residents – receive Social Security,² and about two-thirds of seniors rely on Social Security for half or more of their income.³ With an average Social Security benefit in the state of only \$14,014, Florida residents cannot afford to have their benefits cut.

Chained CPI Would Cut Veterans’ Benefits in Florida

Any cut to Social Security heavily impacts our nation’s veterans: four in ten rely on Social Security, and 35 percent of adult Social Security beneficiaries are veterans or their family members.⁴ Cutting Social Security harms Florida’s veterans just as it does other retired or disabled workers in Florida.⁵

There are 1.6 million veterans in Florida.⁶ In addition to receiving Social Security benefits,⁷ most veteran families also receive benefits from the Department of Veterans Affairs (VA). Many of these benefits are adjusted annually to keep pace with the cost of living. These include Veterans Disability Compensation benefits, Veterans Pension benefits, Military Retirement Pay,⁸ the Subsistence

Allowance for veterans participating in vocational rehabilitation and employment services programs, survivor annuities for deceased veterans’ family members (Dependency and Indemnity Compensation and Survivors Pension Benefits),⁹ educational allowances for veterans’ surviving family members,¹⁰ and Veterans’ Monetary Burial Benefits (a plot allowance). All of these veterans benefits would be cut if Congress were to adopt the chained CPI.

If we consider only the three largest of these benefits,

- 259,248 Floridians received Veterans Disability Compensation,
- 189,144 received Military Retirement Pay, and
- 23,115 received Veterans Pension benefits in 2011.

The total value of these three benefits alone for veterans in Florida was \$8 billion in 2011. **The chained CPI would cut these benefits by about \$231.4 million over the next 10 years** – money taken out of the household budgets of those who have served our country, and money also taken out of Florida’s economy just as it is trying to recover from years of economic stagnation.¹¹

Chained CPI Would Harm Florida’s Economy

The chained CPI would harm not only Florida’s Social Security beneficiaries and veterans, but also its economy – on both the state and county levels. As noted above, veterans’ benefits bring over \$8 billion into the Florida economy every year, and the chained CPI’s cuts to veterans’ benefits would remove over \$231.4 million from its economy over the next 10 years, just as Florida residents are trying to recover from years of economic stagnation.

Social Security brought \$57.7 billion into the Florida economy in 2013, an amount equivalent to 7.1 percent of the state’s personal income.¹² These benefits contribute directly to economic growth and demand throughout the state, particular in rural and non-metropolitan communities, where an even larger share (22.7 percent) of the population receives Social Security.¹³ The chained CPI would reduce this income, much of which gets spent in small businesses throughout the state.¹⁴ The following table shows how much the chained CPI would cut total Social Security benefits, by county, over the next 10 years:¹⁵

Total Cuts from Chained CPI to Income in Florida’s Counties, 2014-23 (cumulative)

Florida Total (67 Counties)	\$6,408,579,043				
Alachua	\$62,545,334	Hardee	\$6,164,480	Okeechobee	\$12,513,752
Baker	\$7,128,778	Hendry	\$7,991,571	Orange	\$252,526,363
Bay	\$55,462,103	Hernando	\$90,875,656	Osceola	\$72,504,542
Bradford	\$8,434,029	Highlands	\$49,107,626	Palm Beach	\$513,115,872
Brevard	\$234,369,972	Hillsborough	\$328,256,944	Pasco	\$193,033,989

Broward	\$460,486,801	Holmes	\$7,183,435	Pinellas	\$369,956,002
Calhoun	\$4,031,573	Indian River	\$74,647,860	Polk	\$220,340,151
Charlotte	\$99,189,961	Jackson	\$16,823,813	Putnam	\$28,932,845
Citrus	\$87,736,807	Jefferson	\$5,123,403	St. Johns	\$74,398,002
Clay	\$57,820,144	Lafayette	\$1,652,711	St. Lucie	\$112,738,283
Collier	\$146,802,340	Lake	\$145,477,568	Santa Rosa	\$47,734,705
Columbia	\$22,319,400	Lee	\$278,104,336	Sarasota	\$212,045,366
DeSoto	\$10,041,193	Leon	\$63,414,634	Seminole	\$118,779,136
Dixie	\$6,195,713	Levy	\$17,038,535	Sumter	\$102,007,377
Duval	\$225,519,511	Liberty	\$1,987,157	Suwannee	\$16,808,196
Escambia	\$98,699,353	Madison	\$6,215,233	Taylor	\$7,635,002
Flagler	\$53,439,810	Manatee	\$144,065,607	Union	\$3,140,150
Franklin	\$4,010,751	Marion	\$168,270,659	Volusia	\$215,633,179
Gadsden	\$14,158,654	Martin	\$73,991,981	Wakulla	\$8,431,426
Gilchrist	\$5,697,297	Miami-Dade	\$522,626,115	Walton	\$19,599,585
Glades	\$3,586,512	Monroe	\$26,223,441	Washington	\$8,285,676
Gulf	\$5,479,972	Nassau	\$29,524,958		
Hamilton	\$4,182,529	Okaloosa	\$56,313,184		

Social Security and veterans' benefits bolster consumer demand in Florida's economy; cuts to these programs would weaken it.

Social Security and Veterans' Benefits Should Have the Most Accurate COLA Possible

Today's COLA already fails to keep up with living costs experienced by seniors and people with disabilities, because it under-measures the inflation experienced by these groups, by failing to account for their higher health-care expenditures. The chained CPI would lower Social Security's COLA even further, leaving many seniors and people with disabilities unable to make ends meet, particularly in their eighties and nineties, when other sources of income have been exhausted. A better measure than current law – and certainly more accurate than the chained-CPI – is the so-called CPI-E for the elderly.

Social Security Should Be Expanded, Not Cut

In a world of stagnant wages, disappearing defined benefit pensions, and risky or inadequate 401(k) plans, Social Security is a fortress of security and reliability. With a majority of Americans facing a retirement income crisis, Congress should be taking steps to expand Social Security benefits, not cut them.

¹ These calculations assume the chained CPI has been in effect for 3 years. Percent benefit reduction under chained CPI from SSA Chief Actuary, “Effects on Social Security Financial Status and on Benefit Levels of Two Potential Modifications to the Automatic Annual Cost of Living Adjustment (COLA) Requested by Representative Xavier Becerra,” June 21, 2011. http://ssa.gov/oact/solvency/XBecerra_20110621.pdf. Average Florida retired worker benefit under current law from SSA, *Annual Statistical Supplement, 2014*, “Table 5.J6— Percentage distribution of monthly benefit for retired workers, by state or other area and monthly benefit, December 2013,” February 2015. <http://www.ssa.gov/policy/docs/statcomps/supplement/2014/5j.html#table5.j6>.

⁷ Many military members and their families receive monthly benefits indexed to the CPI from Social Security. As full participants in the Social Security system, military personnel are in general entitled to the same benefits and are subject to the same eligibility criteria and rules as other employees. For more see DOD Office of the Actuary, “Statistical Report on the Military Retirement System. Fiscal Year 2011,” May 2012, p. 13.

⁸ For information on the interaction and offsets between military retired pay and VA disability payments, and on the relationship between military members and Social Security, see DOD Office of the Actuary, “Statistical Report on the Military Retirement System. Fiscal Year 2011,” May 2012, pp. 11-13.

<http://actuary.defense.gov/Portals/15/Documents/statbook11.pdf>

⁹ Dependency and Indemnity Compensation (DIC) is an annuity paid to spouses, children, and parents of service members and veterans who are deceased or totally and permanently disabled by a service-connected disability. The basic monthly rate of DIC, effective December 1, 2012, is \$1,215 for an eligible surviving spouse. The rate is increased for each dependent child, and also if the surviving spouse is housebound or in need of aid and attendance. In 2011, 355,474 surviving family members of veterans received DIC, with benefits averaging \$14,529. Nationwide, \$5.2 billion were spent on DIC benefits in 2011. Survivors Pension is a needs-based benefit paid to surviving spouses and children of wartime veterans, who meet certain age, disability, and marriage requirements. Nationwide in 2011, 201,955 surviving family members received Survivors Pension, for benefits totaling \$1.2 billion.

<http://benefits.va.gov/BENEFITS/factsheets/survivors/dic.pdf>

¹⁰ The Educational Assistance Allowance is provided under the Survivors' and Dependents' Educational Assistance Program.

¹¹ Projected cuts are based on the assumption of constant levels of total benefits paid. If the amount of benefits paid increases or decreases, the size of these cuts will be correspondingly larger or smaller.
